# BUILDING ELITE SPORTS SURFACES WITH TURF ONE

## ELITE SPORTS SURFACES

At Turf One, we believe elite sports surfaces should be for everyone, not just the professionals.

Our purpose is to create brilliant spaces for everyone to realise potential through sport.

We are a leading sports field contractor with a proud history of building elite sports surfaces for clients from all sectors of the community. We cover all sports and all surfaces from design and construction, installation and maintenance.

## FROM THE GROUND UP

A Turf One project is more than just skin deep.

- Our in-house engineers ensure every design fully addresses the client's requirements and their specific site conditions.
- All groundworks and drainage are constructed to an uncompromising quality standard using our own specialised plant and equipment.
- The playing surface will be selected from among the world's best, from a supplier at the forefront of technology and innovation. And it will be installed by our own specialist installers.
- Our maintenance services and sports facility management plans ensure long term protection of your sports surface investment.

Our depth of experience and expertise in sports field construction means Turf One is uniquely positioned to help you realise the potential of your sports project.

**Turf One covers all sports and all surfaces from design and construction, installation and maintenance**

# NATURAL AND SYNTHETIC FIELDS

## PREMIUM VENUES

Elite sports venues are designed and constructed with uncompromising quality to allow athletes and players the opportunity to achieve their highest potential.

Many sporting codes now have synthetic surface policies and accreditation for local, national, and international grades of play. Whatever the sport, whatever the surface, Turf One can deliver your project to meet or exceed any of these requirements.

## SCHOOLS AND COLLEGES

Sport is a key part of school and college life. At Turf One, we understand the benefits of providing excellent on-campus sporting facilities.

This might be a flagship field or oval, a flexible and functional multi-sport space, or something as simple as transforming a tired and difficult corner of the playground into a vibrant and versatile space.

Turf One can offer a full scope of options to improve the sports facility component of your learning environment and enhance your educational offering.

## CLUBS AND COUNCILS

Local and regional sport is the glue of our social fabric.

At Turf One, we understand the specific requirements of all the different sporting codes. Our design team can provide a fully engineered and site specific solution to meet the requirements of your sport, your club or your local council facility.

## PERFORMANCE

An elite Turf One playing surface will allow you to maximise your sporting potential.

We are a leading sports field contractor with close links to the world's leading manufacturers, including **FieldTurf** and **Beynon**, global leaders in the development and manufacturing of synthetic surfaces. Our design engineers work with you to identify the sports surface that can contribute most to your players and athletes realising their full potential.

## QUALITY ASSURANCE

While our heritage is in earthworks and engineering design, our passion is in delivering quality sports surfaces for our clients.

Our business is based on an ISO accredited management approach to ensure we always comply with Safety, Quality and Environmental standards. Turf One has developed repeatable processes and systems to ensure we build to exacting quality standards, and deliver projects on time, every time.

Every sport, every performance level

# WORLD CLASS RUNNING TRACKS

## DURABILITY

While athletes and coaches focus on how a surface plays, operations managers and ground staff see performance in terms of durability, longevity and maintenance cost.

We design the underlying groundworks to last at least two or three times the lifespan of the finished sports surface layer. This means you can be confident in resurfacing a Turf One project in the years to come without the need to re-engineer or reconstruct the underlying drainage and base works.

## SUSTAINABILITY

At Turf One, environmental responsibility is a key component of every project. We implement appropriate measures to promote positive environmental impacts across all aspects of our business.

Our designs utilise sustainably sourced natural products and recycled materials. Our design engineers can identify sustainable water management opportunities that may be inherent in your project and we can help you unlock these benefits.

**At Turf One we promote positive environmental impacts across all aspects of our business**

# TOTAL MAINTENANCE AND MANAGEMENT PLAN

## DAY ONE PERFECT, YEAR AFTER YEAR

With our focus on excellence in design and construction, your playing surface will give many years of trouble free service. Turf One offers a specialist maintenance service to keep your sports surface performing at its best while ensuring it continues to meet all safety requirements throughout its life.

Talk to us about a comprehensive, whole of product life, maintenance plan for your sports facility.

**“Working with the experts in sports surfaces, the Turf One maintenance plan was ideal for us to ensure there is no down time with the playing surface used by the community.”**
